Solutions applied together

MAINTENANCE SUPPORT
INFORMATION & APPLICATION

Who are we?

We are “Technology without Borders”, an international NGO, founded in Germany, and engaged in projects in over eight countries. Mostly consisting of engineering students, we are a young, dynamic and highly motivated group. Over the years we have built substantial experience in Nicaragua, Ghana and Nepal.

Aimed at improving the maintenance service in rural hospitals, we give trainings in electrical safety and maintenance procedure. The theoretical education is accompanied by practical work on your own medical devices in cooperation with your technicians. Thus our concept is very flexible and can be easily adapted to suit your hospital and situation.

Three of our regional groups are located in Ghana itself, founded and run by students in Kumasi, Cape Coast and Sunyani. Thanks to them, we are able to provide fast, personal and skilled assistance in urgent matters.

How do you apply?

You can apply for our programme in five easy steps

Meeting

Get together with your maintenance department and administration

Questionnaire

Answer the following questions and provide contact information

Send

Click the „send“ button

Review
